

MAGEST

Your Entire Business within your PC

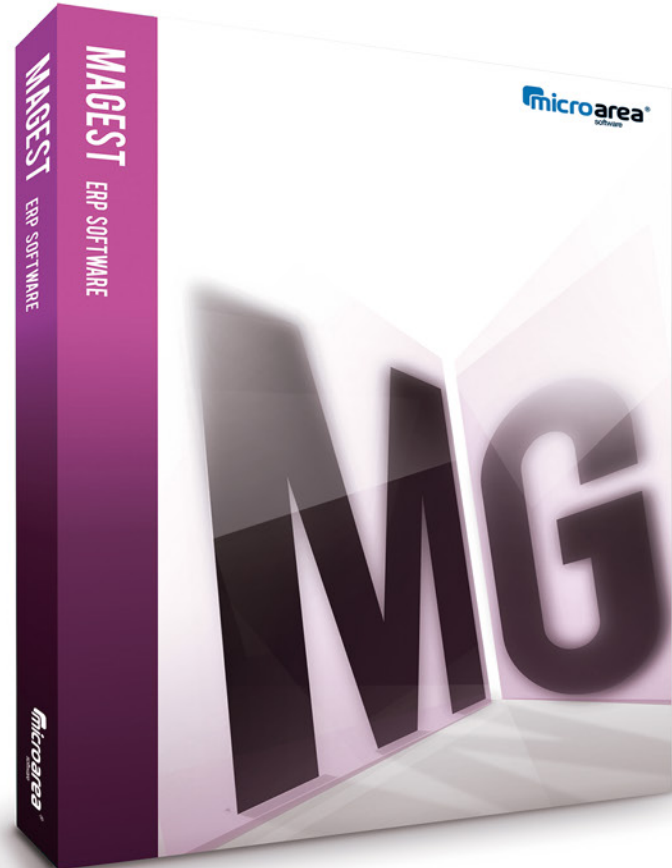

The letters 'MAGEST' are rendered in a large, bold, 3D font. The letters are dark purple/black with a pinkish-purple gradient overlay, giving them a glowing, ethereal appearance. They are set against a background of soft, overlapping pink and purple geometric shapes that create a sense of depth and movement.

MAGEST

Your Entire Business within your PC: Invoicing and Management Software totally integrated with the rest of the products of MICROAREA guarantees the user the inter-performance of our accounting, and much more...

MaGest has been designed to provide the company, independently of its size or activity, an easy to use system of invoicing, storing and commercial management without abandoning the services that the company demands. Suitable for trades people, wholesalers, trading companies, manufacturers, professionals and internet businesses. Use it just to make invoices or to run your entire business. It is the most feature-rich business software for its price. With fewer clicks and pop-up screens than other invoicing software, it simply works smarter.

Your business partner that takes care of invoicing, inventory, purchasing, direct marketing, quotes, scheduling, auto-billing, accounting and more. This new version provides a new and more effective method of working. Finally, all the processes of production, storing, invoicing, management of commercial contacts and automatic accounting fuse into one product. When can we start working?

Client/Server Technology

The new version is based on the MS SQL Server, or your free version of MSDE for the handling of databases. Potency, safety, speed and control are the fundamental advantages that this database offers.

Another important factor is the aptitude of the software to be used simultaneously by an unlimited number of users and, even to gain access to the same system from a remote location.

For Midsize and bigger companies

Manufacturing Companies. MAGEST optimizes processes across your entire mid-sized, discrete manufacturing enterprise through real-time data visualization and "anywhere" access.

Industry Success Stories

Versions

MaGest is available in two easy to use versions:

Professional

Oriented for small-medium companies. It is limited to only one company. Offered in Monoposition version.

Premium

Ideal for large and medium sized companies. Multiposition version. Includes 3 web licences with the possibility of acquisition of additional licenses, Client/Server. Consult the table of technical specifications to differentiate the characteristics that each version includes.

Tech support

Together with every MicroArea product you can benefit from the whole range of services our technical department offers, which are designed to assure that you obtain maximum performance from the acquired products.

The technicians of the MicroArea support department are at your disposition to attend to your questions, help you, and find solutions to your problems...

Preferred Support: For those that need a higher level of attention Preferred Support treats you to service oriented for the more selective client, with a personalized system of attention, and assignment of a telephone extension to accede the service without delay and a dedicated technician dependent on your consultation record. There is a system of visits to facilitate residential support to the user.

Consumer Support: A maintenance program that assures the user the HOTLINE services, product updates, and new versions.
