POSHABILITY

With a strong heart: taking advantage of the nucleus of Magest, we bring the potency of a complete package of commercial management to your sales terminal. A revolutionary, simple interface, within reach of any of its employees will demonstrate the potency of the client applications of POShability working against the application server with the capacities of a giant.

Never again work with a TPV that doesn´t link to your management..

Functions with any system operative with 32 bit technology. The possibility of being configured for use with characteristics like your multicompany, multistore, multicurrency and multiexercise capacities. A fact of note is its total integration with the MICROAREA products, unifying in this way the management with the fiscal, accounting and tax tasks. Observing its structure, will deduce what has been the method of normal work in the management of a company, which awards the user with a simple and easily recognizable method of handling .
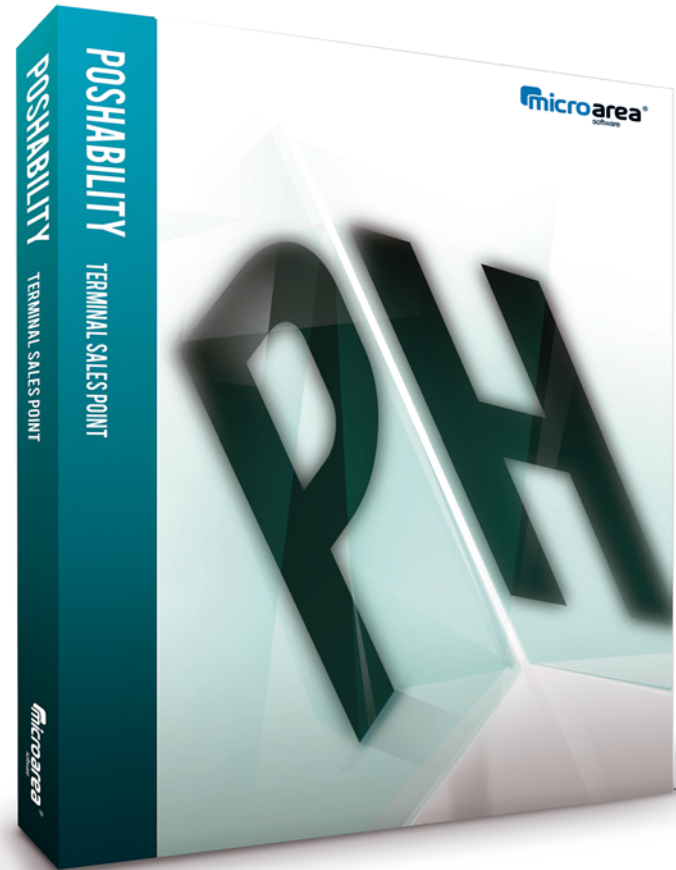

Manage clients, providers, representatives, demand, sales cycles, stocks and stores, charge and payment forecasts, taxation modules, etc..

The product is totally integrated with Maconta or Eoswin, so that both products interact with the accounting notes, being able to realize modifications from it in management.

The user possesses total control of the databases, allowing you to edit them as necessary, giving you the possiblity of generating new information necessary for the program operator

Possesses a user control system that permits you to assign keys and access, with a system of security copy for the safety of data or the automatic repair of databases.

The different documents included for every application process (budgets, Orders, Delivery notes and Invoices) can be totally personalized.

POSHABILITY

Client/Server Technology

The new version is based on MS SQL server, or your free version of MSDE for the navigation of databases. Potency, security, speed and control are the fundamental advantages that this database appoints. Another important factor is the capacity of the software to be utilized simultaneously by an unlimited number of users, including access from a remote location.

Your integration with MaGest permits the sending and receiving of bi-directional data in virtual store form that self manages totally unattended. E-Commerce provides the user solutions of global electronic commerce that can offer your smaller clients and medium sized businesses a larger part of your product offer, giving advantages like:

- Differentiating your business in the super-competitive market of today
- Raising your benefits without incurring additional costs.
- Developing a point of continuous income.
- Offering multiple price levels for better profitability.
- Raising your client portfolio with new companies.
- Positioning your company to take advantage of the expansion of electronic commerce.
- Raising the satisfaction and retention of your clients
- Raising your market quota
- Visit our on-line store to see the possibilities of integration we offer.

PosHability TPV is the perfect terminal sales point solution to work from the MaGest platform.

Some of its most important characteristics are:

Navigation by means of tactile screen or conventional keboard. Interconnection of delegations or remote establishments without needing synchronization processes. Total integration with MaGest databases and the rest of the MICROAREA management products. Total intuitive graphic interface with the characteristics of Windows Vista. No limit in number of terminals in the web or remote terminals.Compatible with any hardware and configurable from the server. Centralized datbase system with local data for better security. System of copy support to avoid the loss ofinformation.
And much more...
